

The Python 7/23/20@1:38PM

“I know that when a snake or serpent is mentioned in the Bible, although not always evil, but when they are used in evil ways or references, it is a symbol of sin and satan! I asked Jesus what exactly though is a python spirit? Jesus asked me what does a python in the natural world do, the physical snake and this is what the Holy Spirit led me to on the internet? On <https://animaltimes.com> in the article titled, “What do pythons eat in the wild this is what I found! Pythons are largely ambush hunters and they feed on vertebrate (those with spines and backbones) prey! As they begin killing their prey by constriction or squeezing, the prey is killed by cardiac arrest and not by crushing. Other python facts from www.abc.net.au in How long does a python kill its prey 1.They can go for 2 years without a feed. 2. They can eat animals (or people) that actually weigh more than they do. 3. They will strike the head to render a prey unconscious whenever possible, then immediately begins to coil itself around the body! 4. When the prey breathes out, it makes their ribcage smaller. At that exact moment, the python will tighten up its grip another notch and after this repeatedly happens, no air can enter the prey's lungs! 5. Once the python begins squeezing the prey, soon the heart can no longer pump blood throughout the body, and then will endure heart failure!!! At <https://animals.mom.me/python-catch-its-prey-9100.html> It says that when pythons are on the lookout for their next meals, they rely on a combination of smell and vision. They never chase after their targets and instead simply opt to catch them off-guard. They lurk in a clandestine (kept secret or done secretly) manner and when ready, swoop in on the unsuspecting prey. They possess pits that are situated around their jaws that enable them to detect the body heat of nearby prey, and to track down the warm blooded creatures amid less than ideal lighting conditions. Once a python is near its desired prey, he rapidly uses its teeth to seize the prey and then begin coiling! Once the python no longer notices the prey's heartbeat, it will finally remove its intense grasp, and eat its prey, its lifeless body starting at the head! After done eating, it will retreat to a place for the digestion process.

“Do you understand Child, just how the python evil, demonic spirit works, for the natural python is a replica of how the demonic

spirit works?” “Yes, Jesus, I do but what does it being on the right side, at the right foot like my friend has seen by different people mean?” “Look again Child, on the internet for it has a spiritual meaning!” “Ok, Lord Jesus I am looking at <https://torahmatters.blogspot.com/2016/02/left-and-right-in-scripture.html> under a discussion on Torah Matters in the, “ Left and Right in Scripture” article which says in the Hebraic thought or cultural way of teaching does not mean just left and right, but the right represents the spiritual and the left represents the physical. It’s not a morality thing like good vs evil, or right vs wrong. It simply addresses 2 realms: the right side connotes(imply) the spiritual realm and the left side connotes the physical realm in addition to the literal or primary reason and is uniquely found in the Old and New Testament in Hebraic thought! (Hebraic thought is: In addition to communicating God’s instruction to His people through the Jewish Bible(which the KJV is translated from) it also refers to a fully-formed cultural tradition, which includes a rich collection of ideas, concepts, stories, and values that emerge from the world of ancient Israel. The authors, both their ideas and the way they arrived at those ideas is “Hebraic thought.)

“So this Jesus, if this is correct, then by seeing these pythons in the spirit, beside the right foot, it means it’s spiritual! Something or a control in the spiritual that is evil and demonic, that I believe by being by the feet, is controlling these people’s footsteps and their actions!” “Yes, Child, it denotes demon control of this person!
