

Cephilia Bug Vision 9-22-23 to 9-23-23 @7:47am

This Vision again I had it on 9-22-23 and 9-23-23 it's called the Cephilia Bug vision and that's how he called it, C e p i l i a. I could not find anything on the internet about it. In the vision both times I was taken to underground facilities. One was actually here in Tennessee. I was taken to it first and it was in a laboratory.

In the laboratory, it's underground where they make a lot of illegal drugs and a lot of things that's being used to harm God's creation. To harm God's people. Both times he took me to see a little container holding them. But in it was all kinds of little bugs. Now I call them maggot looking. Maggot size, but they're actually a little bit bigger than that.

I was able to see them up close and the top side of them. They look like an oval shape. The top, they're silver but then around the edges there's blue. It's like a dark blue. More like a medium blue. When you flip it over... I saw both sides, Jesus let me see both sides, it's silver. But then around the edges coming out of it, is a rust color. These are hybrids created in the labs

They have the mRNA technology (that is in what was used for the pandemic that goes in the arm.) That technology that's inserted into food, the things you put in your arms, (injections) drinks, it's inserted into everything.

The bug, it will attach once they're inside the body. They have claws that extend out. Little white claws and they will attach by retractable long, white claws into the inner lining of the body. I saw it inside the body too. In the stomach, in the nose, in the eyes and the ears. It will be also be inserted into the ears, eyes, mouth and nose when exams are being done like if you have to go somewhere where you're not feeling well. (Doctor's offices & etc.)

Understand I have to do it this way to get the word out. These bugs are created in the labs. They go hand in hand with illegal drugs. So, usually where the illegal drugs are being manufactured underground you're going to find this type of stuff (hybrid, mutations, gene splicing, etc.) too.

It (these Cephilia bugs) are in production already. It's imperative that you pray over your food and your drink in Jesus Christ's name, but also so that your body does not take in anything harmful. Nothing harmful as is in taking and ingested through your skin and such like. You know... seal yourself in the blood of Jesus and be thankful. Ask the Lord to bless you and cover you. It's imperative now because of all they're doing.

Now again I was taken to see these bugs. They are already in production and it's delivering pretty much the same that's in what was in the other that came around when in 2020 so many people were getting sick (mRNA vaccines and injections) But there's more hidden in it and more of them will be activated by different things (sounds, frequencies, note, tunes, waves, etc. through different towers.

Verses

Ezekiel 5:17

Amos 3:7; 4:10

Matthew 24:7

Leviticus 26:25

Habakkuk 3:5

Psalms 91

Exodus

15:26

Deuteronomy 28:58-62

Isaiah 53:5

Now I'm sounding the warning but here's the thing I do not fear these things. I trust Jesus for everything but he does tell us we're supposed to pray and be thankful. Give thanks for our food. We're supposed to be thankful for everything.
