

## DELIVERANCE OF THE BRAIN D.K. Olukoya

Beloved, I would like you to read this message carefully and prayerfully because it concerns everybody. It is entitled, "Deliverance of the brain." In Genesis 3:15, we see one of the most profound verses in the scriptures. It says, "And I will put enmity between thee and the woman, and between thy seed and her seed. It shall bruise thy head, and thou shalt bruise his heel."

(Note: The prayer points for brain under attack that will follow after this message should be said with faith.)

No matter how hard you try, the devil can never be your friend. The enemy can never be friendly with you because of this great statement in the word of God: "It shall bruise thy head and thou shalt bruise his heel." It refers to some important parts of the body. You can bruise a person's heel and the person will still be alive but when you bruise the head, and it is completely broken, the person will be finished. I would like you to take this scripture in Genesis 3:15 to heart.

Let us look at another scripture in 2 Samuel 1:16 Open in Logos Bible Software (if available): "And David said unto him, Thy blood be upon thy head; for thy mouth hath testified against thee, saying, I have slain the Lord's anointed." Again we see the head being referred to here.

The book of Psalm 7:16 O says, "His mischief shall return upon his own head, and his violent dealing shall come down upon his own pate." It says, "His mischief shall return upon his own head." And the popular Psalm 23:5 says, "Thou preparest a table before me in the presence of

mine enemies; thou anointest my head with oil, my cup runneth over.” It is the head that was anointed to make the cup to run over.

The book of Leviticus 19:26 says, “Ye shall not eat any thing with the blood: neither shall ye use enchantments, nor observe times.”

There is a reason for this commandment. The head is the symbol of your destiny. It is an important part of the body and the most important part actually. A person may lack legs and still be alive. A person may lack two hands and still be alive. I have seen a person who did not have legs and was still living. It is possible for a person not to have two legs and two hands and still be alive. It is even possible for a person to lack one internal organ or the other and still remain alive.

But it is not possible to see a headless person that is alive. It is the head that houses the skull, eyes, nose, ears, mouth and brain. The brain is the coordinating center of the whole body. This is why it has not been possible in medicine to transfer the brain of somebody to another body, because taking the brain of one person to another is like changing the person completely.

The human brain is so powerful that it is more superior to the computer. Although every animal has some form of brain, the human brain is completely unique. It gives us the power to speak, think, complain, imagine, control our body temperature, control our blood pressure, etc. It is the brain that enables you to think, dream and reason. This is why in deliverance, it is understood that once the spirit of death enters the brain, it becomes a very serious matter.

Sometime ago, in a town called Akure during a night crusade, there was a word of knowledge that there was somebody there whose brain was caged, that once the person got home, he should look under his bed and he would know why his brain was failing him. There was a certain brilliant student in that crusade. He was always the best in all his class work. But during examinations, he would drop his pen and sleep off only to wake up after the examination. However, the school kept promoting him because the teachers could not understand why the person who came top in all class work cannot take examinations.

So, that night when the boy got home, he looked under his bed not expecting to see anything actually, but as he did, he saw an ancient small pot. He brought it out and inside the pot was something that looked like a human brain dipped inside palm oil. What happened was that any time he had exams to write, the oil would congeal, and he would sleep off in the exam hall. After the exams, the oil would melt, and he would become alert and brilliant again. This happened live; the pot was brought to the crusade. Two things puzzled me:

How could his brain be inside the pot and still be inside his head?

What kind of palm oil was that?

The men of God there anointed the pot, broke it into pieces and set it ablaze. All of a sudden, the boy fell flat on his face and as from that day, sleeping during examination stopped permanently. He was totally delivered.

Beloved, I want you to understand that the brain of man is a primary target of the enemy. It is a prime object of attack

by powers of darkness that is why the issue of a child who does well in school and all of a sudden becomes dull should not be taken lightly by parents.

The brain can receive an arrow. The brain can be polluted. The brain can be padlocked. It can be caged. Sometime ago, a certain girl during a deliverance session, confessed that she had replaced the brains of all her brothers with that of cows and goats. That was why they became dullards all of a sudden. The brain can be demoted. It can be downgraded. It can be blanked. It can be bewitched. It can be transferred. Unfortunately, it is one area we do not normally target our prayers.

Once the enemy padlocks the brain of a person, the destiny of that person is finished. Actually, the difference between the rich and the poor is information. When somebody gets information and he is able to use it well, he can never be down. So any satanic alteration of a person's brain changes the person's life. There are many people who need to cry to the Lord seriously because of what the enemy has done to their brain before they got born again.

There are many students who need to cry to the Lord seriously. They teach other people and they pass, but they themselves fail. It means that something has gone wrong somewhere. Sometimes, you see some people come out of the examination hall rejoicing because they think they have done well only for them to find out later that the opposite is the case. It is because their brain has fallen under attack. Since the brain is responsible for the ability to function and

to use one's organs correctly, the enemy attacks it seriously.

Many years ago, we held a crusade that was so serious that some people wanted to run away so we held them down and ensured that they prayed the prayers before going home. There was also a man that wanted to run away but we held him and insisted that he prayed. That was in those days, you cannot hold anybody down now.

As the prayer was going on he began to confess to being a wizard. And he said that he had converted the brain of all the children in his family to sawdust, so he was the only one in that family that passed his exams while all other persons in the family failed. We asked him why he did that, and he said their daddy always gave three pieces of meat to the person who did well. So, because of meat, he took away the brains of these people. He told us that the brains could be restored through prayers.

The brain is responsible for our intelligence, memory power, speech, taste, smell, sight, and it also maintains our balance. The reason why you are able to walk straight is because your brain is still okay.

There are symptoms by which you can recognize that the brain is under attack. Beloved, the blunt truth is that there are many mad people walking about in the street everyday. It is not only those who are in psychiatric hospitals that are mad. A lot of people who are walking about are mad because the enemy has attacked their brains.

## **SYMPTOMS OF A BRAIN UNDER ATTACK**

Moodiness.  
Fearfulness.  
Bad decision.  
Insanity.  
Negative thinking.  
Oversleep.  
Forgetfulness.  
Lack of interest for others.  
Suicidal feeling.  
Unreasonable crying.  
Poor concentration.  
Pessimism.  
Unexplainable headaches.  
Dizziness and fainting always.  
Inability to pay attention for a long time.  
Chronic lateness.  
Bad management of time.  
Disorganization.  
Not learning from the past.  
Poor finishing and poor planning.  
Lack of clear goal.

All these are signs of a brain under attack. There is need to cry to the Lord for deliverance. The enemy knows that when a person's brain is captured, his destiny changes forever. You need to understand that if you change your brain, you will change your life. If something positive happens to your brain to upgrade it, your life will be completely changed.

Excessive day dreaming, restlessness, always seeking for conflict, fight, or quarrels are signs that a brain is sick.

Talkativeness and difficulty awaiting your turn for something are signs that the brain is under attack.

Addiction to alcohol, drinks, tobacco, sleep and food is a sign of an attack on the brain. When a person has intensive dislike for change, it is a sign that the brain is under attack. Misfired aggression, fighting the wrong battle, and fighting the wrong persons are signs that the brain is under attack.

It is a sign of brain disorder when a person wants to marry a man or woman whose language he or she does not understand. It is madness.

Pride and arrogance are signs of a sick brain, and also oversensitivity to insults. What do you have that God did not give to you? So, who are you really that you cannot be insulted? Was Jesus not insulted? They spat on His face and slapped Him.

He had the power to command them to be paralyzed and it would be so but instead He said, "Father, forgive them for they know not what they do."

Heavy dosages of coffee, chocolate, and candies is madness. In fact, the brain of anyone who smokes can never be the same again. If you want your brain to be 100 per cent normal, you must not smoke or drink. If you always have the feeling that everybody hates you, it is a sign that your brain is under attack.

I want you to understand that there is a department in the demonic world where their job is to specifically target the head; the brain of man.

If your brain is in captivity or under oppression, you cannot become what God wants you to be although you know and can see it. When your brain is demonized, the evil spirit inside it will confuse you and make sure you do the wrong things always.

When your brain is cursed or under a spell or bewitched and you are not delivered, you will be using your brain wrongly, and you could also be intelligent in an evil way. When the brain is under an evil covenant, the affected person will remain at one level.

This is why sometimes after going through deliverance, you see candidates having a strong desire to improve themselves and to educate themselves further. It shows that something has been cleared away from their brains. Unfortunately, some people have agreed with the enemy that they cannot go beyond where they are now.

When there is an evil seed inside the brain, and it is not uprooted, the affected person will experience dullness, he will sleep off anytime he wants to read or do any mental work. He will not be able to memorize scriptures. When there is a satanic embargo on somebody's brain, the person cannot go anywhere. This is the reason the Bible says, "Do not swear by your head" (Matthew 5:36). Swearing by your head means you are swearing by your brain too.

### **WAY OUT**

Repent of any known sin. This is very important. Go for deliverance of the head and brain in order to break the curses that attack the head.

Receive heavenly blood transfusion. When the blood from heaven flows into your blood stream, it will energize your body, soul and spirit and deal with any arrow, or seed planted in any part of your body.

Another thing to do is to deal with the serpent and scorpion in the head. When you forget what you should not forget, and remember what you should not remember, your brain needs deliverance.
